

Autumn Revolution Bittersweet

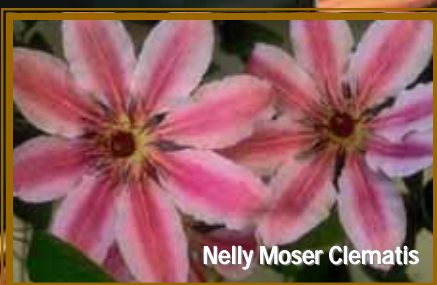

Blue Bird Clematis

Purpurea Plena Elegans Clematis

Jackmanii Clematis

Nelly Moser Clematis

Virginia Creeper

Celastrus - Bittersweet

Autumn Revolution Bittersweet

Celastrus scandens 'Bailumn'

Foliage: Glossy green
Habit: Twining vine

Fruit: Orange, red seed
Hardiness: Zone 2

New listing for 2010. A breakthrough in bittersweet culture. Autumn Revolution is a self fruitful cultivar (no pollinator required) producing bright orange fruit that are more than double the size of the species. A First Editions introduction from Bailey Nurseries.

Clematis - Hardy Varieties

- Blue Bird Clematis** - Semi-double, outward-facing purple blue flowers in early summer
- Blue Boy Clematis** - Nodding, 4-5" steel blue flowers; blooms from June to September
- Ruby Clematis** - Bell shaped, mauve-red flowers in May and June; attractive seed heads
- Purpurea Plena Elegans Clematis** - Double, 2-3", rosy purple flowers from July to September
- White Swan Clematis** - Beautiful creamy white flowers in May and June, 5" diameter

Clematis - Tender Varieties

- Etoile Violette Clematis** - Deep purple, 5 inch blooms, free flowering and vigorous.
- Hagley Hybrid Clematis** - Shell-pink, 4 inch blooms.
- Huldine Clematis** - Pearly-white flowers, vigorous grower.
- Jackmanii Clematis** - Deep purple, 4 - 6 inch blooms, the best known variety.
- Nelly Moser Clematis** - Pastel mauve-pink with carmine bar, 4 inch blooms.
- Niobe Clematis** - Very deep almost black ruby-red, 4 - 5 inch blooms.
- Ramona Clematis** - Lavender-blue, 5 - 7 inch blooms.
- Ville de Lyon Clematis** - Carmine-red blooms with lighter center.

Humulus - Hops

Golden Hop Vine

Humulus lupulus 'Bianca'

Foliage: Golden yellow
Habit: Twining vine

Fruit: Yellow bladder-type
Hardiness: Zone 3

A great vine for an arch or trellis. Produces yellow, bladder-type fruit in late summer.

Lonicera - Honeysuckle

Dropmore Scarlet Honeysuckle

Lonicera x brownii 'Scarlet Trumpet'

Foliage: Waxy green
Habit: Twining vine

Flowers: Orange, red
Hardiness: Zone 2

The trumpet-shaped flowers bloom heavily throughout the summer. Requires a trellis for support. Developed by F.L. Skinner of Dropmore, Manitoba.

Honeybelle Honeysuckle

Lonicera x brownii 'Baillel'

Foliage: Waxy green
Habit: Twining vine

Flowers: Golden
Hardiness: Zone 3

New listing for 2010. A compact twining vine with a first flush of flowers that resembles of waterfall of gold. Attracts hummingbirds and butterflies. A First Editions introduction from Bailey Nurseries.

Parthenocissus - Ivy

Engleman Ivy

P. quinquefolia 'Englemannii'

Foliage: Glossy green
Habit: Twining vine

Fall Colour: Red
Hardiness: Zone 3

A selection of Virginia Creeper with smaller leaves. Less vigorous, but is self-clinging. Deep red fall colour.

Virginia Creeper

Parthenocissus quinquefolia

Foliage: Glossy green
Habit: Twining vine

Fall Colour: Red
Hardiness: Zone 2

A fast growing vine with small blue fruit and dark green foliage that turns crimson red in the fall. Excellent for covering fences and buildings.

Vitis - Grape

Native Grape

Vitis riparia

Foliage: Green
Habit: Twining vine

Fruit: Blue-purple berries
Hardiness: Zone 2

Occurs naturally in riparian areas in Manitoba. Produces abundant clusters of small fruit that is excellent for wine or jelly. Light fall frost prior to harvest improves fruit quality.
