Warrior[®] Caragana

Caragana arborescens 'Durwoth'

WarriorTM Caragana - *Caragana arborescens* 'Durwoth'

A tree form of common caragana that has a strong central leader and compact growth.

Botanical Name: *Caragana arborescens* 'Durwoth'

Family: Fabaceae

Common Name: WarriorTM Caragana

Origin: A clonal selection from a population of over 4,000 seedlings growing at the Cheyenne Tree Farms Ltd. in north Edmonton. Selected by Rick Durand of Portage la Prairie, MB.

Hardiness: Zone 2 (Canadian and USDA)

Mature Size: 3 metres (9') by 1.4 metres (4.5').

Growth Rate: Medium

Description: WarriorTM is a compact, upright tree form of common caragana. The coarse and rugged branches grow upright into a tight, columnar tree. A dominant leader needs to be established early and WarriorTM will retain it's single stem form over time.

Culture: Adapts well to a variety of well drained and dry soils and requires full to partial sun.

Pest and Disease: Good resistance to most pests, moderately susceptible to mildew.

Propagation: Softwood cuttings or budding on common caragana.

Sales: WarriorTM Caragana makes an excellent screen and hedge. Low maintenance is required to retains it's upright and compact shape.

Production: Propagation by licensed growers only. COPF royalty of 50 cents.
